MADHWARAJ KULKARNI

Business Analyst | Aspiring AI Product Manager
Pune, Maharashtra · +91 90750 85119 · kulkarni.madhwaraj@gmail.com

Summary

Business Analyst with 2 years of experience in AI automation, chatbot requirements and data analysis, who also designed and tested an AI product from idea to user feedback (SpeakEasy). Looking to move into AI Product Management at an early-stage startup or product company.

Experience

VIT Infotech | Pune
Business Analyst, Jan 2025 – Present

- Contributed to end-to-end planning of an AI chatbot solution for an Australian Dealer Management System (DMS) client: **gathered and analysed business requirements, created user stories and functional specifications**, and partnered with stakeholders and development teams on solution design and implementation readiness.
- Designed an **Employee Leave Management solution** on IB-X, an AI-powered platform integrating RPA and BPM, after **gathering requirements and mapping employee movement workflows** for HR process automation.
- Reviewed AI/ML automation workflows on the IntelliBuddies RPA platform, noting response issues and sharing improvement observations with the team.
- Evaluated **prompt engineering** techniques across ChatGPT and other LLM tools, assessing **response quality, accuracy and consistency** to identify business and client-facing applications.
- Supported pre-sales by preparing pitch materials and assisting with outbound prospecting campaigns for AI automation solutions.

Product & Analytics Case Studies

SpeakEasy: AI Speech Preparation Tool | Self-initiated product, May 2024

- Designed and prototyped an AI tool that turns a topic into **framework-based speaking points** (PREP, with delivery tips per section) for students and nervous speakers; ran a **39-response questionnaire and 8 live demos** with mentors and peers.
- Early results: **100% found it easy to use, 85% rated the overall experience 4 or 5, 36 of 39 would recommend it.** Tested my own prediction (30% positive) against the demo result (6 of 8) and documented the bias in a sample of people I know.
- Compared **7 tools** (Yoodli, Speeko, Orai and adjacent products) and turned tester feedback into product decisions, including a voice-agent test.
- **Chose to stop** after finding scope creep, a crowded market and low willingness to pay (median about ₹100 a month; many users said ChatGPT already did the job).

BlinkMoney: Product Teardown & Founder Feedback | Case study

- Analysed a mutual-fund-backed lending product across **user problem, target users, eligibility flow, revenue model, competitors** (Volt, Zerodha, AbhiLoans), **USP and SWOT**.
- Recommended **five improvements**: an eligibility breakdown with EMI simulator, onboarding trust signals, an iOS launch, repayment tracking and risk education.
- Was not selected, then asked for feedback and received **1:1 feedback from the founder**: build more hands-on experience, which I am now seeking in an early-stage product role.

MoveInSync: Workplace Dashboard & QBR Presentation | Case study

- Built a **Power BI dashboard** on Q2 2026 meeting-room data: **18K bookings, 86.17% completion rate, 60.56% average room utilization, 44.2-minute average meeting duration**, broken down by month and office.
- Prepared a **six-slide QBR presentation** from it. Found that **13.39% of booked room hours went unused**, with **London leading and Dublin lagging on utilization**, and recommended auto-blocking users who skip late cancellations plus punctuality ratings.

Zomato: Product Teardown | Self-initiated

- Mapped customer, payment and delivery flows, business model, metrics and pain points, and proposed improvements. Designed as a 12-slide LinkedIn-carousel-style deck.

Earlier Experience

PV Clean Mobility Technologies (JV of Vitesco Technologies, Germany) | Pune
Business Analyst Intern, Jul 2021 – Sep 2021

- Ran root cause analysis to find process inefficiencies and operational bottlenecks; built interactive Power BI dashboards to support data-driven decisions.

Enabling Fundamentals Private Limited | Nashik
Market Research Analyst Intern, Jul 2022 – Aug 2022

- Ran LinkedIn outreach campaigns with the founder and tailored messages by client profile, winning 1 prospect.

Education

MBA (Digital Transformation), Symbiosis International University | 2023 – 2025 | GPA 6.18
BBA (Business Analytics), Christ University | 2020 – 2023 | GPA 8.2

Certifications

- IBM AI Product Management Professional Certificate, IBM (Coursera), Mar 2026
- IBM Product Management Professional Certificate, IBM (Coursera), Mar 2026
- AI For Everyone, DeepLearning.AI (Coursera), Mar 2025 | Prompt Engineering with ChatGPT, Vanderbilt University (Coursera), Jan 2025
- Google Project Management Professional Certificate (Coursera), Feb 2024 | Microsoft Power BI Data Analyst Professional Certificate (Coursera), ongoing

Academic Projects

- **TRAF-FIX, real-time traffic alert app:** created UI mock-ups, documented user workflows and helped define features for congestion tracking and alerts.
- **Waste Management Optimization:** analysed inefficiencies in a heavy machinery manufacturing setting and presented Figma wireframes of workflow improvements to stakeholders.

Skills & Tools

AI & Automation: LLM tools, prompt engineering, chatbot requirements, RPA (IntelliBuddies), generative AI
Product: user stories, requirements documentation, wireframing (Figma), competitor research, user workflow mapping
Data & Research: Power BI, data visualisation, market research, customer segmentation, root cause analysis, SWOT
Soft skills: stakeholder communication, analytical thinking, self-directed learning, attention to detail
